

ADVANCES IN ELECTROMETALLURGY

ADVANCES IN ELECTROMETALLURGY (ISSN 1810-0384) is a cover-to-cover English translation of *Sovremennaya Elektrometallurgiya*, published four times a year by the E.O. Paton Electric Welding Institute, National Academy of Sciences in Kiev, Ukraine. This unique journal publishes original research and review articles in the following subject areas:

- ELECTROSLAG TECHNOLOGY
- ELECTRON BEAM PROCESSES
- PLASMA-ARC TECHNOLOGY
- VACUUM-INDUCTION MELTING
- VACUUM-ARC REMELTING
- ELECTROMETALLURGY OF STEEL AND ALLOYS
- GENERAL PROBLEMS OF METALLURGY
- ENERGY AND RESOURCES SAVING

Contents of No. 1/2009

Intermetallic thermal hardening of titanium alloys produced by magnetically controlled electroslag melting
Electroslag casting of billets for pressure stop valve bodies
Testing technology of producing large intricate castings of a heat-resistant steel by centrifugal electroslag casting
Monitoring and stabilisation of the molten metal level in the mould in electron beam melting
Hard erosion-resistant coatings of the Ti-B-C system deposited in vacuum
Formation of phases with a complex crystalline structure in alloys of the Al-Co system in vapour phase deposition
Investigation of changes in the structure of materials of electrodes for plasma-arc heat sources
Induction melting of metals in a sectional mould
Alloying a heat-resistant steel for high-temperature components of energy units of new generation thermal power stations
Development of a system for monitoring the process of steel melting in arc steelmaking furnaces

Subscription information

ISSN 1810-0384, quarterly, 2010, Volume 26, £160/\$250, including postage. Back issues (2004–2009) are also available at a reduced price, please write for details to cisp@cisp-publishing.com. Please subscribe using the order form, through our website or your subscription agent. We accept Visa and Mastercards or can send you a proforma invoice.
